

# DOORBLOK™

Doorblok™ fits into the entrance / exit points of a building. The firefighting water within the building will operate the Doorblok™ system keeping the liquid pollution within the building. This simple yet effective method of containment will hold run off and spills within the building reducing the flow to the drainage and outside environment.

- NO MORE TRIP HAZARDS AROUND PEDESTRIAN WALKWAYS
- OPERATES AUTOMATICALLY
- SIMPLE ROBUST CONSTRUCTION
- LOW LEVEL EXCAVATION
