

DRAINBLOK™

Drainblok™ is an easy to use kit for sealing off a flow within a duct or pipe, making it a perfect addition to any containment or maintenance tool-kit, above or below ground.

Drainage containment requires a good understanding of the risks and Drainblok™ allows isolation of flow at ground level keeping the operator safe. Offering a simple and cost effective solution for pollution containment.

KIT INCLUDES:

- CARRY BAG
- 3MTR EXTENDING POLE
- 150MM TO 450MM STOPPER SIZES AVAILABLE
- 4LTR INFLATION PUMP
- SAFE LOW PRESSURE QUICK INFLATOR

“

We have been using Drainblok™ for a number of years so that our drainage survey teams work dry. This has greatly reduced equipment contamination as well as keeping our staff as clean and safe as possible. Drainblok™ has also been used for testing duct sizes without the need for confined space entry.
